

JEFFERSON M. GARDE

AI AUTOMATION SPECIALIST

Padre Garcia, Batangas, Philippines | 09978950420 | jeffgarde001@gmail.com | LinkedIn / Portfolio

PROFESSIONAL SUMMARY

AI Automation Specialist with a background in process-driven, quality-controlled environments. Applies structured process logic, input/output validation, and systemic troubleshooting to streamline modern business workflows. Builds hands-free automations using Make.com, Google Workspace, and AI processing to reduce repetitive work, improve response times, minimize data-entry errors, and keep business systems synchronized.

BUSINESS AUTOMATION CAPABILITIES

WORKFLOW & PROCESS AUTOMATION	Make.com, multi-branch routing, conditional logic filters, automated lead & order management
AI BUSINESS INTEGRATION	Google Gemini AI - data extraction, automated information sorting, intelligent email drafting
APP INTEGRATION & ADMIN TOOLS	Google Sheets, Google Forms, Gmail, Google Drive, Webhooks
OPERATIONS & QUALITY CONTROL	End-to-end process mapping, systemic error resilience, workflow quality testing, operational troubleshooting

FEATURED AUTOMATION PROJECTS (SELF-BUILT / PORTFOLIO)

Dental Appointment Automation & Status Management System

Tools: Make.com, Calendly, Google Sheets, Gmail

- Designed an end-to-end appointment management system that reduces manual scheduling work and keeps appointment records consistently updated.
 - Automatically captures new patient appointments, centralizes records, and notifies the dentist with a simple approval or rescheduling flow.
 - Sends patients the appropriate confirmation or rescheduling message and keeps appointment statuses synchronized when cancellations occur.
 - Uses reliability safeguards to help keep appointments, updates, and notifications processing during temporary service or connection issues.
- Business Value:** Reduces administrative workload, minimizes missed appointment updates, improves response time to patients, and provides a more organized appointment flow.

Lead Management & Automated Sales Alert System

Tools: Make.com, Google Gemini AI, Webhooks, Google Sheets, Gmail, Telegram

- Built an automated intake system that captures incoming leads, uses AI to evaluate prospect information, logs updates into a Google Sheets CRM, and drafts personalized follow-up emails.
- Integrated real-time mobile alerts for high-priority leads and automatic retries to reduce lost leads during database interruptions.

E-Commerce Order Processing & Alert Workflow

Tools: Make.com, Google Gemini AI, Google Sheets, Gmail

- Streamlined customer order logging with AI text classification for delivery notes, automated confirmation receipts, and high-value order flagging for priority review.
- Configured error-handling logic to bypass invalid customer emails safely without stopping general processing.

Hands-Free Expense & Receipt Data Extraction

Tools: Make.com, Google Gemini Vision AI, Gmail, Google Sheets

- Designed a document processor that reads emailed receipt attachments, extracts date, vendor, line items, and totals via Vision AI, and records clean financial data into spreadsheets.
- Implemented filter gatekeepers and database reconnect rules to prevent junk entries and reduce manual typing errors.

WORK EXPERIENCE

Epson Precision (Philippines) Inc. | Production Operator - Electrical Engineering Section,
Production Equipment Engineering Division Oct 2018 - June 2021

- Supported engineering teams in transitioning manual operations into automated, machine-driven processes.
- Updated and verified system programming scripts using RCminitool to adapt equipment to updated operational requirements.
- Reviewed operational flowcharts and conducted input/output validation checks to ensure equipment responded accurately to system rules.
- Investigated process deviations and assisted technical teams in troubleshooting root causes to minimize operational downtime.

JAPAN TOBACCO INTERNATIONAL (JTI) | Production Operations Helper (via MAR Employment) Oct 2017 - Jul 2018

- Monitored continuous material flow and operational health across interconnected machinery, packaging lines, and conveyor systems.
- Maintained strict adherence to standard operating procedures within a SCADA-monitored facility to uphold product quality and throughput.
- Identified operational bottlenecks and flagged error warnings early to keep daily output running smoothly.

EDUCATION & TECHNICAL TRAINING

AMA Computer Learning Center (ACLC) - Lipa City | Computer Hardware Servicing 2014 - 2016

- Mechatronics Training** - EPSON (Automated Equipment, Electromechanical Systems)
- Building Cabling Systems Training** - ACLC Lipa
