

JEFFERSON M. GARDE

AI & WORKFLOW AUTOMATION SPECIALIST

- Padre Garcia, Batangas Philippines | 09978950420 | jeffgarde001@gmail.com
- **LinkedIn:** <https://www.linkedin.com/in/jeff-garde-793788204/> | **Portfolio:** <https://website-portfolio-rouge-psi.vercel.app/>

PROFESSIONAL SUMMARY

AI & Workflow Automation Specialist with a background in automated production systems and process-driven operations. Builds workflows for lead management, appointment handling, order processing, document extraction, notifications, and data synchronization using automation platforms, AI, webhooks, and connected business applications. Applies process mapping, conditional logic, input/output validation, error handling, workflow testing, and systematic troubleshooting to build reliable end-to-end automations.

TECHNICAL SKILLS

- Workflow Automation:** Make.com, Zapier, multi-step workflows, conditional routing, filters, webhooks, automated lead/order workflows
- AI Integration:** Google Gemini AI, Gemini Vision AI, AI by Zapier, data extraction, classification, AI-assisted processing
- Business Applications:** Airtable, Asana, HubSpot, Trello, Slack, Google Sheets, Google Forms, Gmail, Google Drive, Calendly, Telegram
- Workflow Reliability:** Error handling, retry logic, input/output validation, workflow testing, process mapping, operational troubleshooting

FEATURED AUTOMATION PROJECTS - SELF-BUILT / PORTFOLIO

AI-Powered Lead Qualification & Sales Routing System

Tools: Zapier | AI by Zapier | Airtable | Typeform | Asana | Slack | Gmail

- Built an automated lead pipeline for data cleanup, CRM deduplication, AI scoring, qualification, and conditional routing.
- Routed VIP, Qualified, and Unqualified leads into appropriate Asana tasks, Slack alerts, CRM statuses, and email responses.
- Implemented AI failure handling with Slack alerts and a manual-review CRM status.

AI-Powered Customer Support & Ticket Management Automation

Tools: Zapier | AI by Zapier | HubSpot | Trello | Gmail | Slack

- Built an AI-assisted support workflow that analyzes incoming customer emails, classifies request type and urgency, updates customer information in HubSpot, and creates Trello support tickets.
- Prepared AI-assisted response drafts for staff review and triggered Slack alerts for high-priority or urgent support issues.
- Added duplicate-processing protection to prevent repeated emails from generating duplicate tickets.

Dental Appointment Automation &Status Management

Tools: Make.com | Calendly | GoogleSheets | Gmail

- Built an appointment workflow that captures patient bookings, centralizes appointment records, and routes dentist approval or rescheduling actions.
- Automated confirmation and rescheduling emails while synchronizing appointment status changes and cancellations.
- Added workflow safeguards for temporary service or connection failures to improve processing reliability.

AI-Assisted E-Commerce Order Processing Workflow

Tools: Make.com | GeminiAI | GoogleSheets | Gmail

- Built an order-processing workflow that records customer orders, classifies delivery instructions with AI, and generates automated confirmation emails.
- Added conditional logic to flag high-value orders for priority review.
- Configured error-handling paths for invalid customer emails so individual failures do not stop the main workflow.

AI Receipt & Expense Data Extraction Workflow

Tools: Make.com | GeminiVisionAI | Gmail | GoogleSheets

- Built an email-driven document workflow that processes receipt attachments and extracts dates, vendors, line items, and totals using Gemini Vision AI.
- Structured the extracted information for automated recording in Google Sheets.
- Added validation filters and reconnect / error-handling logic to prevent invalid entries and improve workflow reliability.

WORK EXPERIENCE

Epson Precision (Philippines), Inc.

Production Operator - Electrical Engineering Section, Production Equipment Engineering Division | Oct 2018 - June 2021

- Supported engineering teams in transitioning manual production processes to automated, machine-driven operations.
- Updated and verified equipment programming scripts using RCminitool based on changing operational requirements.
- Reviewed process flowcharts and performed input/output validation to verify equipment behavior against defined system logic.
- Investigated process deviations and supported root-cause troubleshooting to minimize operational disruption.

Japan Tobacco International (via MAR Employment)

Production Operations Helper I (via MAR Employment) | Oct 2017 - Jul 2018

- Monitored continuous material flow across interconnected machinery, packaging lines, and conveyor systems.
- Followed standardized procedures within a SCADA-monitored production environment to maintain operational quality and throughput
- Identified process bottlenecks and equipment warnings for timely escalation.

EDUCATION

- **AMA Computer Learning Center (ACLC) - Lipa City** Computer Hardware Servicing | 2015 - 2016

TECHNICAL TRAINING

- Mechatronics Training - Epson (Automated Equipment, Electromechanical Systems)
- Building Cabling Systems Training - ACLC Lipa
